# ***THE REINKE DIFFERENCE***

For more than 50 years, being “different with purpose” has been at the core of all we do at Reinke and it’s made us the irrigation system of choice for farmers worldwide. Yes, our pivots look different, but there’s a reason behind the design – to add strength without adding weight and to increase efficiency without sacrificing durability. From pivot center to end gun, we’ve created solutions that exceed expectations. It’s just what we do.

## ***100% REINKE CERTIFIED***

Any time you buy a Reinke product, be it an entire pivot, or one part, you can be sure it’s 100% Reinke Certified. What does 100% Reinke Certified mean? It means we stand behind our products. We hold ourselves to a higher standard, from engineering and design to manufacturing and out to the services our dealerships provide.

0.1

0.2

0.3

0.4 ADVANCED+

# RPM CONTROL PANELS

Reinke Precision Management (RPM) control panels are custom built for reliability and trouble-free use. Plus, they're easy to upgrade and customize.

## 0.1 RPM BASIC

- ▲ Value priced
- ▲ High-quality, powder-coated steel enclosure
- ▲ Features include: commercial or generator power, end gun control, speed control, directional operations, auto reverse and start/stop

## 0.2 RPM STANDARD

- ▲ Easily upgradeable
- ▲ High-quality, powder-coated aluminum enclosure
- ▲ Includes RPM Basic panel features, plus: higher corrosion-resistant enclosure with many additional options such as digital speed control, end gun override, low-voltage safety and frost control

## 0.3 RPM ADVANCED

- ▲ Expanded inclusive features
- ▲ Standardized digital speed control display
- ▲ Includes RPM Standard panel features, plus: digital end gun and auxiliary control, sector programming and GPS for improved accuracy

## 0.4 RPM ADVANCED PLUS™

- ▲ Improved user experience
- ▲ Full-color 4.3" customizable touch screen display
- ▲ Includes RPM Advanced panel features, plus: flow monitoring, digital pump control, selectable auxiliary options and pressure monitoring with transducer

### 0.5 RPM CONNECT™

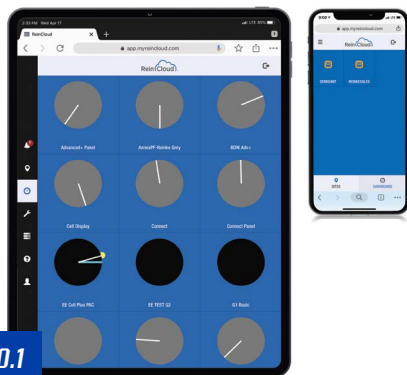

- ▲ Screenless, remote-operated panel using ReinCloud®
- ▲ Limited controls on the panel including start, direction and stop
- ▲ Same features as RPM Advanced Plus through ReinCloud

### 0.6 RPM PREFERRED TOUCH

- ▲ All-inclusive panel
- ▲ Larger full-color 10.1" touch screen display
- ▲ Includes RPM Advanced Plus panel features, plus: VRI, start sequence, multilingual display, USB port, downloadable logs and much more

### 0.7 RPM ANNEX™

- ▲ Upgrade an existing panel to the latest pivot control technology
- ▲ Utilizes backend components of the host panel
- ▲ Works on Reinke or competitive panels
- ▲ Available configurations: Advanced Plus (AnnexAPT™), Connect (AnnexCT™) and Preferred Touch (AnnexPFT™)

# REMOTE MANAGEMENT

*A better way to collect and display valuable data for improved irrigation management. From irrigation monitoring and controls to soil moisture and weather data, ReinCloud puts your ag-based data to work.*

## 0.1 REINCLOUD

A powerful web-based software platform where all the monitor and control features are located. With the ReinCloud dashboard, the ability to monitor and operate numerous pivots from one location makes it possible to be in more than one place at a time.

When you need to look at what is going on with your operation, the smart irrigation controller dashboard will give you information at a glance. You can also quickly view irrigation system status, weather, sensor data and irrigation controls, making it easy to make on-the-go decisions.

View your data on a high-level widget or in a detailed graph. It's also easy to get an at-a-glance look on the mapping widget, depicting your equipment where it resides in the field.

Stay informed on system status through notifications.

## 0.2 REINCLOUD-READY® PRODUCTS

ReinCloud-Ready products make it easy to access a wide range of equipment using satellite, cell or radio communications. From irrigation controllers to soil moisture stations, ReinCloud-Ready products provide the right data to help make informed decisions for your operation.

## 0.3 BASE STATION

The Base Station is a radio-based communication system that allows you to monitor and control any system from your home or office computer as if you were standing right in front of the panel, saving you time, labor and operating costs. Using a computer does NOT require a change to the data management plan.

### 0.4 RC10

The hardware that controls the pivot via ReinCloud with a cellular or satellite connection, which is housed within Reinke's patented, double-wall tower box and can be mounted at the main control panel or at the end of the system.

### 0.5 RS300 FIELD STATION OPTIONS

Whether you're looking for tank level data or for a full weather and climate station, the RS300 can provide a versatile and reliable platform compatible with a variety of sensor options.

#### Weather and Climate

- RX30 Weather Station Combo
- Wind speed and direction
- Ambient temperature
- Humidity
- Rainfall
- Leaf wetness
- Solar radiation

#### Water Metering

- Pressure transducer (0–50 psi)
- Pressure transducer (0–200 psi)
- Ultrasonic water level
- Submersible water level
- Deep well water sensor
- Pressure switch
- Flow meter monitoring (select digital meters)

#### Soil Moisture

- Sentek® enviroSCAN Probe
- AquaCheck® Sub-Surface Probe
- Decagon® 5TE Probe

Field Scan

VRI Prescription

0.2

Field Scan

VRI Prescription

0.3

# VARIABLE RATE IRRIGATION (VRI)

**Optimize water distribution.  
Maximize yield potential.**

*Variable rate irrigation applies precise amounts of water to match numerous field prescription variables within each field. Multiple prescriptions can be created based on soil variables and define topography. From the RPM Preferred Touch, you'll be able to immediately verify that everything is running properly.*

## 0.1 SECTOR

Sector VRI segments the coverage area into multiple pie-like slices (sectors) up to  $\frac{1}{10}$ th of a degree by controlling the speed of the pivot, which increases or decreases the water application rate. The base application depth can be easily adjusted higher or lower without changing the prescription. Works with existing sprinkler packages.

## 0.2 ZONE

In addition to the Sector VRI, the coverage area can further be divided into as many as 84 rings. By combining the sectors and rings, more than 300,000 independently controlled zones are created for precision water application. Additional hardware is required.

## 0.3 SAC VRI

As efficient as the parent system, the new patent pending Reinke SAC VRI provides precision irrigation throughout the swing arm corner. This user-friendly technology includes a predictive prescription that can be optimized easily over time. The Reinke SAC VRI is available with the RPM Preferred Touch or AnnexPF panel. Additional hardware is required.

## **TECHNOLOGY FOR TOMORROW**

We believe in developing precision management technologies that stay two, three, ten steps ahead of tomorrow's challenges. And that starts in the field by continuously testing and researching what works and where we can improve our systems. It's not about farming today, but how we can better farm in the future.

0.3

# CENTER PIVOT SYSTEMS

## 0.1 ELECTROGATOR

Introduced in 1968, the Electrogator® was the first reversible, electric drive center pivot with under-truss design. The Electrogator II is an improved version with many advancements that provide benefits including increased stability, multiple outlet spacing options and longer spans.

- ▲ Pipe sizes: 6", 6 5/8", 8 5/8" and 10"
- ▲ Galvanized steel, painted chromium nickel+, galvanized chromium nickel+, aluminum, stainless steel and poly-lined
- ▲ Slope: The maximum grade limit for a Reinke span is 15%. **Up to 20% with the X-Treme package.**

## 0.2 THE ALUMIGATOR

The Alumigator® is the industry's ONLY aluminum center pivot, which is 40 percent lighter than all-steel systems. This virtually eliminates wheel tracks, making it ideal for operations like sod farms. The Alumigator also features the widest tower base in the industry.

- ▲ Pipe sizes: 6" and 8"
- ▲ A-60G and A-80G are options that include aluminum pipe with a galvanized steel trussing and towers

## 0.3 THE MINIGATOR

The Minigator® is a cost-effective solution that's ideal for smaller fields and low-gallage wells that can be configured with a Kwik Tow option for easy transport with a pickup or tractor.

- ▲ Pipe size: 4 1/2"
- ▲ Pipe material: galvanized only

## PIVOT CENTER

### Stands the Test of Time

- 01. Corrosion-resistant, domed aluminum collector reel
- 02. Heavy-duty full sweep, 90° elbows at bottom and top riser pipe to minimize friction loss
- 03. Hook-and-receiver pipe joint connection for unparalleled rotational movement and flexibility
- 04. High-strength 18" pivot center bearing. Uses 1/4" thick, close-fit tubing supported with 8 strategically placed gussets
- 05. Riser gasket seals against a stainless-steel wear sleeve, creating a long-lasting seal
- 06. Optional pivot center walkway
- 07. 6", 8" or 10" riser pipe available with eye-level pressure gauge
- 08. Corrosion-resistant, powder-coated aluminum main control panel enclosure with a pneumatic strut that holds the door open even on the windiest day
- 09. 8" x 3" x 1 1/4" roll-formed, C-channel legs for unparalleled strength and durability
- 10. Easily retrofitted to any competitive pivot pad
- 11. Easily accessible, adjustable height, main control panel mount

3 Leg Pivot Center Option is Available on 4 1/2, 6 & 6 5/8" pipe diameters

# INNOVATIVE DESIGN

Side View, Rotational Movement

Top View, Side-to-Side Movement

Side View, Up-and-Down Movement

## 0.1 INTERNAL FLEX JOINT

The tables illustrate that the Reinke internal flex joint has less friction loss at a real application slope of 15° as compared to the external ball-hitch coupler.

## 0.2 PATENTED V-RING SEAL

Each seal is securely set inside the pipe completely protected from the deteriorating effects of UV light.

- ▲ No disruption of water flow
- ▲ Flange-to-flange contacts creates a stronger seal
- ▲ 25-Year warranty

## 0.3 DOUBLE-WALLED TOWER BOX

Exclusive double-walled tower box provides a moisture-free environment for electrical components.

- ▲ High-quality, UV-resistant materials
- ▲ The strongest, longest-lasting tower box in the industry
- ▲ Mechanical safety interlock on cover requires first disconnecting power to the tower

*Durability. Stability. Efficiency. All benefits of Reinke's innovative design aimed at providing superior performance and industry-leading ROI. From our patented V-ring seal that offers no disruption of water flow to the strongest, longest lasting tower box in the industry to our high-strength single-leg tower design—Reinke irrigation systems are just built better.*

#### 0.4 SPANS ENGINEERED FOR HIGH PERFORMANCE

Reinke spans are engineered for maximum strength and minimum weight making it the most efficient irrigation system in the industry.

- ▲ Water pipe trussing is spaced every 19' (not 20 or 22 like our competitors) and made with high-strength steel for added support and an even load distribution
- ▲ Truss rods ( $\frac{5}{8}$ " or  $\frac{3}{4}$ " diameter) are universal in length and made of high-strength, low-alloy steel
- ▲ 3" diameter, galvanized stiffener connects the bottom of the trussing to the tower leg, which diverts stress away from the water pipe
- ▲ Less crown height reduces the center of gravity, which increases stability

#### 0.5 THE SINGLE-LEG TOWER

High-strength steel used in the single C-channel leg eliminates the need for cross bracing between the tower legs. That's why our single-leg tower always stands superior.

- ▲ Wider tower base for increased stability
- ▲ Less intrusive structure improves water application at the tower and causes less disturbance to taller crops
- ▲ Increased flotation for better performance

#### 0.6 SPRINKLER OUTLETS

Features a  $\frac{3}{4}$ " half coupler which is welded onto the pipe for increased strength and eliminates water flow obstruction caused by flow-drilled couplers.

- ▲ Outlet spacing is available in 30", 40" or 57" spacing
- ▲ Stainless steel couplers are added to chromium nickel pipe

#### 0.7 SINGLE-PHASE POWER

Reinke's 230-volt single-phase option is ideal for center pivot systems running on small acreage fields where 480-volt three-phase power is not available. Single-phase systems are limited to a maximum length of 1000' or six towers, and are offered in all pipe materials using standard household power.

#### INDUSTRY'S BEST STRUCTURAL WARRANTY

*Reinke offers a 5-year structural warranty that's unparalleled in the industry. With so few guarantees in farming, we want to give you more peace of mind.*

0.4

0.5

0.6

0.1

0.1

# TOWER DESIGN

## 0.1 SMARTER TOWER SUPPORT DESIGN

- ▲ Attach 3" diameter, galvanized stiffeners to the bottom of the trussing instead of directly to the water pipe
- ▲ C-channel leg design features high strength steel, which eliminates the need for cross bracing between the tower legs
- ▲ Less intrusive structure improves water application at the tower and causes less disturbance to taller crops
- ▲ Increased flotation for better performance
- ▲ Wider tower base for increased stability

## 0.2 SPAN HEIGHTS

\*Crop clearance may vary based on span length

# THREE-WHEEL TOWER BASE

## 0.1 RIGID THREE-WHEEL TOWERS

Reinke three-wheel towers provide the additional flotation needed for soil types that easily rut and will also help in traversing difficult terrain. They're also more efficient and economical than competitive four-wheel tower options that add more weight to the system and more components to maintain.

## 0.2 FLEXIBLE THREE-WHEEL TOWER BASE

Our industry-exclusive patented, award-winning tower base keeps all three tires on the ground at all times, placing a more consistent load on the drivetrain, providing power to all three wheels. Reducing the load on each tire improves flotation and reduces wheel ruts.

0.2

0.1

0.2

0.3

0.4

# DRIVE TRAIN

## 0.1 REINKE WHEEL GEARBOX

Sporting its signature blue look, this high-performance gearbox will outwork and outlive any competitive gearbox in the field.

- ▲ New high-torque gears enable greater load capacity
- ▲ Extra long carriage bolts allow use with reinforced rims
- ▲ The 13-bolt mounting pattern is compatible with most center pivot brands
- ▲ Provides years of reliable service
- ▲ Minimizes gear wear allowing for a longer lifespan
- ▲ Reduces running temperatures, extending the gear's life
- ▲ Backed by the best warranty in the industry

## 0.2 WHEEL GEARBOX — TOWABLE

Possessing high-quality components, this gearbox can easily switch from towable to non-towable and carries a 10-year or 10,000-hour warranty.

## 0.3 SPRINKLER LUBE®

The unique dual-property lubricant ensures maximum protection against leaking, corrosion and gear wear, saving you money and downtime.

## 0.4 CENTER DRIVE

A high-efficiency gear motor delivers exceptional torque to propel your system over the roughest terrain and through difficult soil conditions. Specifically designed and built for the demands of mechanized irrigation.

- ▲ Helical gear design – 95% efficiency
- ▲ High-strength steel shafting provides long life and dependability
- ▲ Top fill plug positioned to set correct oil level
- ▲ All critical electrical connections are encapsulated to resist moisture penetration
- ▲ C.S.A. and UL approved
- ▲ 3 output RPMs (low 60:1 ratio or 29 RPM; standard 40:1 ratio or 43 RPM; high 25:1 ratio or 70 RPM)
- ▲ 8-year, 8,000-hour warranty

# TIRES

## 0.1 MACH II

A plastic tire developed for center pivot application. Molded from a special blend of Dow resin, the material provides ultra-violet protection, crack resistance, durability and a long life.

## 0.2 RHINO GATOR

Engineered specifically for pivots, this airless tire option is a super-tough, high-density composite. The tire features a high-traction tread design with thousands of hours of proven field experience.

## 0.3 AGRI-TRAC

A tough, long-lasting trac that allows pivots to keep moving and easily handles heavy soil, mud bogs and hillsides (only available on 11" x 22.5" recap tires).

## 0.4 SPECIALTY TIRES

Reinke offers many different types and sizes of pneumatic tires, including our high-performance Titan radial tire. This radial tire has a much higher load rating than a standard 6-ply, making it ideal for use on swing arm corners or other longer and/or heavier spans.

## 0.5 BARRICADES

An extra measure of safety if your pivot doesn't move in a complete circle. Long-lasting galvanized permanent or movable barricade options to ensure your pivot stops or reverses where you want it to.

# SPRINKLERS & PRESSURE REGULATORS

Impacts

Rotators

Accelerator

Orbitor

Spinner

Twister

i-Wob2

Xi-Wob

All Sprays

## 0.1 SPRINKLER OPTIONS

Reinke has always offered only the best sprinkler products to provide a multitude of droplet sizes and pattern widths using advanced rotary, offset axis rotary and fixed spray sprinkler technologies best suited for the specific crop or application. Whether you use our 30", 40" or 57" outlet spacing, we have a product available that's capable of generating the desired application rate. By utilizing a variety of plates, operating pressures, mounting heights and sprinkler spacing, we can custom design a sprinkler package to fit virtually every field.

## GENERAL SPRINKLER PERFORMANCE SPECIFICATIONS

| SPRINKLER   | PRESSURE RANGE(PSI) | PATTERN/STREAM TYPE   | THROW DIAMETER |         | APPLICATION |           |
|-------------|---------------------|---|----------------|---------|-------------|-----------|
|             |                     |   | @ 12' HT       | @ 6' HT | INTENSITY   | AVG. RATE |
| Impacts     | 30 to 60            | 1 or 2 Slow Rotating Streams                                  | 73–105'        | NA      | HIGH        | LOW       |
| Rotators    | 10 to 40            | Multi-Trajectory, Multiple Slow Rotating Streams              | 68–78'         | 50–68'  | MEDIUM      | LOW–MED   |
| Accelerator | 6 to 15             | Multi-Trajectory, Multi-Variable Speed Rotating Streams       | 43–55'         | 36–58'  | MEDIUM      | MEDIUM    |
| Orbitor     | 6 to 20             | Offset Axis, Multi-Trajectory, Multiple Fast Rotating Streams | NA             | 42–58'  | LOW         | MEDIUM    |
| Spinner     | 6 to 20             | Full-Random, Multi-Trajectory, Multiple-Fast Rotating Streams | 44–54'         | 42–56'  | LOW         | MEDIUM    |
| Twister     | 6 to 20             | Offset Axis, Multi-Trajectory, Multiple Fast Rotating Streams | 45–62'         | 38–55'  | LOW         | MEDIUM    |
| i-Wob2      | 10 to 15            | Offset Axis, Multi-Trajectory, Multiple Fast Rotating Streams | NA             | 34–57'  | LOW         | MEDIUM    |
| Xi-Wob      | 10 to 15            | Offset Axis, Multi-Trajectory, Multiple Fast Rotating Streams | 45–50'         | 35–51'  | LOW         | MEDIUM    |
| All Sprays  | 6 to 20             | Multi-Trajectory, Fixed Streams                               | 35–55'         | 14–54'  | HIGH        | HIGH      |

## 0.2 PRESSURE REGULATORS

Pressure regulators are also useful for reducing higher pressures near the pivot point where the sprinkler nozzles are the smallest, thus minimizing plugging, wind drift and evaporation. They are required for use with many of the sprinkler options that have been engineered for operating pressures within a specific range, for optimum water application, extended life of the product and ultimately increased yield.

Pressure regulators eliminate the pressure variation at the sprinkler nozzle caused by:

- ▲ Variations in available water supply
- ▲ Fluctuations in demand such as end guns and swing arm corners
- ▲ Elevation changes within the field

## 0.3 DROPS AND SPRINKLER ACCESSORIES

As always, Reinke also offers a wide variety of sprinkler mounting components to customize your system to your specific needs. Contact your Reinke dealer for more information.

0.2

0.3

# END GUNS & BOOSTER PUMPS

## 0.1 END GUNS

End guns are an economical way to add profitable acres to your farm operation. The optimum operating pressure for an end gun can range between 40 and 70 psi and is based largely on the nozzle size of the end gun which is determined by the system length, total system flow (gpm), operating pressure and the distance of throw or effective coverage of the end gun.

### RECOMMENDED END GUN OPERATING PRESSURE

| NOZZLE | END GUN PSI | END GUN GPM | BOOSTER PUMP/PSI BOOST | EFF. COVERAGE |
|--------|-------------|-------------|------------------------|---------------|
| .40"   | 40—50       | 28—32       | 2 HP / +32             | 59'—63'       |
| .50"   | 43—53       | 47—53       | 2 HP / +33             | 75'—81'       |
| .60"   | 46—56       | 71—79       | 2 HP / +33             | 86'—92'       |
| .70"   | 50—60       | 100—110     | 2 HP / +31             | 97'—103'      |
| .80"   | 54—64       | 138—151     | 2 HP / +28             | 108'—114'     |
| .90"   | 57—67       | 172—187     | 5 HP / +33             | 115'—121'     |
| 1.0"   | 60—70       | 211—228     | 5 HP / +28             | 125'—133'     |

## 0.2 BOOSTER PUMPS

Reinke understands the importance of efficiency. We place the booster pump at the end of the system near the end gun to provide maximum power and minimize friction loss.

# BUILT TO LAST

*Every system that rolls off our line has been engineered and designed for season after season of reliable service. We take great care in choosing the highest-quality materials and implementing state-of-the-art manufacturing practices to not only live up to our high standards, but yours as well. As a matter of fact, one of our oldest systems has been in service since 1968.*

## 0.1 REINCOAT®

A Reinke system is complete when it's galvanized by ReinCoat, a subsidiary of Reinke that boasts a state-of-the-art galvanizing facility and process. This includes pre-treatment of system components in a self-enclosed pre-treatment room, which prepares the components for dipping into the zinc-filled kettle contained in a white fume enclosure. The end result of the ReinCoat galvanizing process is a superior protective coating that is ready to stand up to the elements and add further strength to a Reinke irrigation system.

**SEE OUR GALVANIZING PROCESS IN ACTION  
WITH THIS REINKE YOUTUBE VIDEO!**

# SWING ARM CORNERS

Combine the structural integrity of the Reinke Swing Arm Corner with the precision accuracy of the ESAC™ for an extremely efficient and uniform water application. Irrigate 158 out of 160 acres on a quarter section, or 98.7 percent of total acres. Electronic sprinkler sequencing provides you with a smart solution for virtually eliminating over and under watering throughout your fields' corners.

## SAC GPS

*In 2002, Reinke was the first to introduce SAC GPS to the market.*

## SAC OPTIONS

**Mini-SAC:** 156' span + 51' end boom = 207' total system length

**Mini-SAC:** 175' span + 61' end boom = 236' total system length

**Standard SAC:** 194' span + 85' end boom = 279' total system length

**Super SAC:** 213' span + 105' end boom = 318' total system length

- ▲ Proven design for structural integrity
- ▲ Patent pending technology increases water uniformity on all Reinke SAC models
- ▲ Navigator GPS guidance for more efficient water application and precise path control
- ▲ Can be configured as either a 'leading' or 'trailing' swing arm position to increase the number of irrigated acres in part circle applications
- ▲ Improve Swing Arm water uniformity and precision with the patent-pending SAC VRI.

# SPAN OPTIONS

## 0.1 WRAP SPAN

Wrap Span allows you to irrigate acres that were previously off-limits to center pivot irrigation. By placing the Wrap Span system in one or more joints (except the last bendable joint), you can wrap your pivot with or without the SAC or SSAC option up to 180°.

### Two Configurations

- ▲ Wraps up to 10° – utilizes a standard joint
- ▲ Wraps up to 90° – uses a span joint that reroutes the water through a flexible coupler

## 0.2 DROP SPAN

Easily disconnect one or more pivot or lateral move spans and proceed past an obstacle to irrigate previously unreachable acres. Pick up an additional span or spans of a different length if the field widens on the opposite side of the obstacle. Adjustable legs allow you to keep the span off the ground when it's disconnected. The auto-stop function self-aligns the parent system to the dropped span for ease in connecting.

0.1

0.2

0.3

# LATERAL MOVE SYSTEMS

*Our Electrogator and Alumigator lateral move systems receive the same high-quality materials and attention-to-detail engineering as the rest of our irrigation line. They also have enough custom features to match your exact needs. When the goal is watering your square or rectangular field while conserving water, look no further than Reinke.*

## 0.1 TWO-WHEEL POWER TOWER/HOSE PULL

Our two-wheeled option offers great versatility with features such as forward and reverse tow options, double inlet hose systems, internal check valves and quick coupler connections on both ends. A double-end feed option is also available.

## 0.2 FOUR-WHEEL POWER TOWER/HOSE PULL

Our best option for larger fields. Floating axles keep all four tires on the ground, allowing this unit to pull large hoses (up to 8") as required by high flow systems. With either power cord pull or an onboard power supply, this is your right-hand man.

## 0.3 PIVOTING LATERAL

With one system you can now receive the benefits of both pivot and lateral move irrigation. With this highly versatile system, you can plan multiple paths for one rectangular field, L-shaped fields or numerous irregular configurations. It uses only one cart path and no towing is necessary.

0.4

## 0.4 CANAL FEED

The Reinke Canal Feed system carries its own pumping equipment and generator within its compact and clean design. You'll also receive annual energy savings from its ability to reduce system pressure loss by using the center-feed option in larger fields.

## GUIDANCE SYSTEM OPTIONS

- ▲ Navigator GPS – Provides extreme accuracy in timing and application
- ▲ Furrow – Uses specially designed wheels that track a V-furrow parallel to the travel path
- ▲ Buried wire – Requires less maintenance and creates no obstacles
- ▲ Cable – Assures accurate lateral movement and uniform water distribution over the entire field
- ▲ Fence – Requires minimum maintenance and creates no additional obstacles in the field

0.1

0.2

## TOWABLE SYSTEMS

*Flexibility without sacrificing strength and efficiency.*

### 0.1 FOUR-WHEEL PIVOT MOVER

Unique in its ability to quickly adapt to movement in multiple directions. Wheel hubs are mounted on base beams and can quickly swivel 90°. Plus, the quick hitch can be moved to any side for easy towing.

### 0.2 TWO-WHEEL KWIK TOW

Sets the standard for short field towable pivot systems. Available with a hydraulic lift option as well as a motorized Kwik Tow Kit that allows you to move the system laterally for short distances. Can be towed from the end of the system.

### 0.3 EDMP – SINGLE SPAN ENGINE DRIVEN PIVOT

The Reinke engine-driven Mini-Pivot is a single-span system ideal for small fields and areas where power access is limited. It comes with a variety of gearbox, span length and end boom options and has a maximum system length of 318'.

## **EVERY INCH. EVERY ACRE.**

Whether your farm has unirrigated corners, is oddly shaped, demands frequent light applications or has an obstacle or two, you can be sure we have a specialty system that meets every one of your needs – and covers every inch of your field.

# OUR DEALERS

*Armed with a truckload of experience, expertise and extensive factory training, your Reinke dealer will work with you in everything from custom design to installation to making sure your irrigation system performs as expected year after year.*

*Like our pivots, your Reinke dealer is in it for the long haul. They'll settle for nothing less than superior irrigation performance and will always be around for unparalleled service and support.*

## 0.1 REINKE CERTIFIED PLUS

The Reinke Certified Plus Program is a Reinke Certification program that is administered by Reinke Manufacturing Co., Inc. Each person is required to take at least six classes covering a range of technical areas and pass an examination of the material covered for each class. Persons passing the exams with a score of 90% or better receive the Reinke Certified Platinum Plus distinction.

## 0.2 REINKE PRIDE

The Reinke Pride Program is a voluntary "Dealer Excellence" program administered by Reinke Manufacturing Co., Inc. There are four different levels that indicate the level of excellence achieved – Bronze, Silver, Gold and Diamond.

## 0.3 REINKE CERTIFIED

A Reinke Certified Authorized Dealer lets you know that the dealership is qualified to perform work on Reinke Irrigation Systems. Furthermore, the dealer is able to order Genuine Reinke Parts that are recommended and covered under various Reinke warranty programs ensuring your system's longevity and reliability.

## 0.4 REINKE DEALERSHIP NETWORK

With hundreds of locations across the United States and Canada, Reinke Dealers are able to provide timely service and minimize the downtime of your irrigation system.

## EXPERIENCE & EXPERTISE

From custom design to installation to making sure your irrigation system performs season after season – Like our pivots, your Reinke dealer is in it for the long haul.

# REINKE FIRSTS

For more information visit **Reinke.com**

01. Introduced the first reversible, electric drive center pivot with collector ring allowing continuous rotation and span over 100' in length with a patented V-jack truss design
02. First to incorporate interchangeable pipe and truss components.
03. First gear-driven towable system with rubber tires
04. Introduction of the Minigator, the first system with 4 ½" water pipe designed for low water supplies and smaller fields
05. The first Chromium Nickel Plus (CN+) steel water pipe option
06. Introduction of the first successful aluminum system, the Alumigator
07. The V-ring seal is completely hidden and allows the flanges to join together without the interference of a gasket, which completely protects the gasket from UV rays
08. The exclusive double-walled tower box provides a moisture-free environment for electrical components
